

MTS-520US3

- 2 -

32. (Amended) A method of manufacturing an optical disk comprising the steps of:

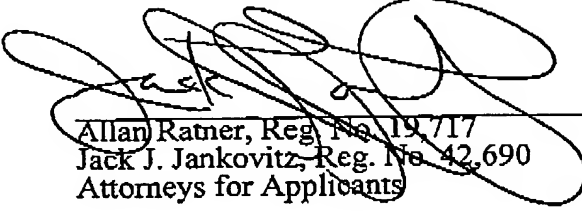

forming, on a substrate, a data zone having pits indicating data signals readable by light radiation;

forming a reflective layer on the data zone; and

trimming the reflective layer to form markings on the pits functioning as a track on the optical disk;

wherein the markings form a barcode pattern indicating information.

Respectfully Submitted,

Allan Ratner, Reg. No. 19,717
